

The territory's museum offers a modern and multimedia exhibition route in order to achieve a good knowledge about the Earth's and mankind's transformations thanks to reciprocal influences and steps.

At the ground floor you can find the section dedicated to earth's evolution and human life in Pianura Padana, while at the first floor Delta's territory's history and transformations are developed. A great section is dedicated to the Etruscan period and to the ancient city of Spina in which everyday life is evocated in a very scenographic approach.

To find out more you can use interactive workstations where you can find more pictures, videos and texts.

Moreover, the offer for schools or visitors is completed by an equipped laboratory and an extra exhibition room.

SERVICES AVAILABLE :

- ⇒ Didactic area and laboratory
- ⇒ Educational activities for schools
- ⇒ Formation courses
- ⇒ Parties and birthday parties area
- ⇒ A huge garden
